

INTERCHANGEABLE LENSES

CLEAR AND DIFFUSED

THICK AUTOMOTIVE-GRADE POLYCARBONATE

OPTICAL FEATURES ENGINEERED TO SPREAD LIGHT

EASY SWAP

Remove the lens using a small screwdriver or trim tool, and simply snap your new lens in its place!

The Diode Difference

XM0209B

At Diode Dynamics, we conduct all necessary engineering and testing for our products internally in St. Charles, Missouri. Unlike other manufacturers, we test our lights, to check the resulting performance and output. We conduct this testing in-house with our goniometer, which is a machine that slowly rotates the light, and measures the effective beam pattern.

ASSEMBLED IN USA

Many of our products are proudly produced in-house by our manufacturing division. This allows us to maintain complete quality control with the final application in mind and deliver products to the market much quicker than others in the industry.

STAGE SERIES ROCK LIGHTS

Introducing Stage Series Rock Lights! With 1000 lumens of peak output, these USA-assembled units set a new standard in the rock light category for brightness. LED rock lights are a perfect solution to add light underneath your vehicle when on the trail.

With their compact size and numerous mounting solutions, these can be added anywhere you need some extra light - your cargo area, under the hood, on a roof rack, the side of a trailer, and more. The applications are endless!
