The Diode Difference

XM0080F

At Diode Dynamics, we conduct all necessary engineering and testing for our products internally in St. Charles, Missouri. Unlike other manufacturers, we test our lights, to check the resulting performance and output. We conduct this testing in-house with our goniometer, which is a machine that slowly rotates the lamp, and measures the effective beam pattern.

STAGE SERIES REVERSE LIGHT KIT

- Allows you to mount two SSC1 or SSC2 pods underneath the Toyota 4Runner, Tacoma, and Tundra rear bumper
- Plug-and-play wiring harness, with OEM connectors and toggle switch override
- Provides high-power reverse light, and red accent light
- Designed and assembled in USA
